Set'n'Drive - Parameterising resistor for ECGs

Part no.: 47.901.1104.50

Description

- The resistor is protected against contact already integrated into a housing and is quick and easily inserted into the terminal block of the electronic control gear. Push in - Ready.
- Information on resistance and automatic mounting with ADS systems on request.

Short description: For easy insertion into LED ballast for adjusting the lout

Product name: Set'n'Drive (S'n'D) parameterising resistor

Resistor: 3.4 kOhm

Pkg.: 600
