Declaration concerning the EU REACH Chemicals Regulation

Regulation (EC) No. 1907/2006 dated 18 December 2006

BJB is not a manufacturer or importer of chemical substances, but rather a processor of preparations and articles.

Our products are exclusively products (not chemicals), consisting of one or more constituent articles, which are not intended to release any substance under normal and reasonable foreseeable conditions of use.

With reference to article 33 of the REACH regulation (EC) No. 1907/2006 we inform you:

Some products contain the following substances from the REACH SVHC Candidate List (*Candidate List of Substances of Very High Concern for Authorisation*) <https://echa.europa.eu/de/candidate-list-table>, updated on 23 January 2024 – 240 substances) in a concentration more than 0.1% by weight per article:

- Lead (CAS No. 7439-92-1 / EC No. 231-100-4)
- Lead titanium trioxide (CAS 12060-00-3 / EG-Nr. 235-038-9)
Lead titanium zirconium oxide (CAS 12626-81-2 / EG-Nr. 235-727-4)
- Siloxanes
 - Octamethylcyclotetrasiloxane D4 (CAS Nr. 556-67-2 / EC No. 209-136-7)
 - Decamethylcyclopentasiloxane D5 (CAS 541-02-6 / EC No. 208-764-9)
 - Dodecamethylcyclohexasiloxane D6 (CAS 540-97-6 / EC No. 208-762-8)
- 2-(2H-Benzotriazol-2-yl)-4-(1,1,3,3-tetramethylbutyl)phenol (UV-329)
(CAS 3147-75-9 / EG-Nr. 221-573-5)
- Melamine (CAS 108-78-1 / EG-Nr. 203-615-4)

Within the scope of the EU REACH regulation such products are also declared accordingly during order processing.

Further substances from the above mentioned REACH SVHC Candidate List are not contained in amounts > 0,1% per article.

The listing of a substance in the REACH SVHC Candidate List only entails an obligation to inform the customers. This is not tantamount to a restriction or prohibition of the substance concerned.

Our products are fully compliant with the substance restrictions of directive 2011/65/EU (RoHS).

The applications of lead comply with the following RoHS exemptions:

- Lead in specific copper alloys, e.g. for contacts or fastening elements according to RoHS Annex III exemption 6(c)
- Lead in high melting temperature type solders on Edison bases of incandescent lamps, according to RoHS Annex III exemption 7(a)
- Lead in specific electrical / electronic components on PCB boards according to RoHS Annex III exemptions 7(a), 7(c)-I and 7(c)-II

The aforementioned siloxanes D4 / D5 / D6 can be contained as residual constituents in silicone rubber in some silicone insulated wires or silicone gaskets.

The substance 2-(2H-benzotriazol-2-yl)-4-(1,1,3,3-tetramethylbutyl)phenol (UV-329) is contained in some UV-stabilized polycarbonate grades as a UV stabilizer in quantities up to 1%.

The substance melamine is contained in a proportion of up to 1% in rapid prototyping components with plastic laser sintering that are manufactured from the flame-retardant material PA2210FR.

Best regards,

BJB GmbH & Co. KG
